# Urbaco Overview

# Mobility made safe and easy

Our humble beginnings stem back to the invention of our key product in 1984 - the retractable bollard.

Founded in 1986, the Urbaco Company has developed, grown, and has been shaped around this key product, which lead to the development of a continuously evolving line of products and services related to the world of public areas: site and street furnishings, fixed and removable bollards, technical bollards for energy supply and access control systems.

Where innovation is key, Urbaco is constantly developing new products.

With the use of the latest technology and a constant focus on quality, Urbaco redefines mobility to create a higher standard of living for today's world.

Thanks to our retractable bollards, we are the undisputed market leader for access control systems. Today Urbaco designs, builds, maintains and sells technological solutions for urban areas that protect sensitive areas where the security of buildings and people are critical.

Based on a constant search for excellence and innovation, Urbaco has developed systems with extraordinary resilience to shocks and thus meet the highest demands in terms of impact strength: ASTM standards, PAS and DOS.

# The Vision

As a leader and key player in its market, Urbaco must offer effective and innovative solutions to address the concerns of its customers before they even know they need us.

With flexible solutions, both for access control management and high security, and by using the most advanced information and communication technologies, Urbaco must predict needs to build a safer world with a higher standard of living.

# The URBACO Universe: Inventor of Retractable Bollards

**1984**

Invention of the retractable bollard

**1986**

Foundation of Urbaco SARL

**1991**

An industrial IT group, ATS'CO, joins the "Urbaco" group. Its electronics and IT engineers develop new technologies.

**1990**

Urbaco designs the first pedestrian area system in the world with centralized technical management in Aix en Provence.

**1994**

Urbaco SARL becomes Urbaco SA with a capital of 3.100.000 FRF (472.590 €).

## 2000

Urbaco joins the "Leading World Exporters Club". This is the acknowledgement of significant international development, excellent know-how and especially recognition of its status as the leading French company in its export market.

## 2007

Urbaco is constantly innovating, and to date has designed six generations of retractable bollards. Urbaco has filed 12 international patents and has more than 160 models and four international brands. A renewal takes place in 2007. The 7th generation of bollards is born: LUXOR.

## 2011

Launch of the electro-mechanical bollard. Urbaco widens the choice of technology for its G6 range with a new type of motorization. Electromechanics complements electro-hydraulic and electro-pneumatic methods.

Confident of its central position in urban development and social progress, Urbaco develops a range designed to limit the accessibility to private roads and urban spaces for people with reduced mobility, the PMR range. Urbaco also develops a corporate sponsorship by supporting the Association Valentin Haüy.

A new vision for a new direction 

## 2004

Urbaco joins the Came Group, the world leader in powered gates, barriers and pedestrian doors, to offer a wider range of products and services to local authorities, industries, private individuals and security organizations.

## 2010

Launch of the ONE range, composed of very high security bollards that meet the strictest standards in terms of impact resistance.

**CAMEGROUP**  
freedom innovation

CAME Group, a recognized world leader in the field of automations systems for security and access control, is present on the market with 480 subsidiaries and exclusive dealers in 118 countries worldwide. CAMEGROUP is owned by the Menuzzo family and employs 940 people. It achieved a turnover of almost €162 million in 2011.

# Conversion of Public Areas to High Security

Today, Urbaco's expertise is driven by five main focuses:

## ACCESS CONTROL SOLUTIONS

Complete systems composed of retractable bollards, automation and electrical components, centralized control software, and control equipment.

These systems are designed to organize traffic flow in community and commercial areas, semipedestrian areas where traffic is restricted, in parking lots, and in residential areas, by limiting access to authorized vehicular traffic only.

## ICT SOLUTIONS

At the center of Urbaco's development, ICT solutions demonstrate the company's willingness to innovate and propose technological solutions in line with modern times.

The most advanced information and Communication Technologies are adapted and integrated.

## HIGH SECURITY SOLUTIONS

Urbaco offers a range of high security solutions that meet the most stringent international standards in terms of impact resistance.

A range designed to protect sensitive areas where the need for security of buildings and people are critical. Our security solutions manage and regulate traffic in strategic access points.

## EMOTION SOLUTIONS

Highlight the beauty of a historical monument or simply provide the visibility needed for a safe environment, ...

The EMOTION Solutions range is aesthetically pleasing and adds to urban design, all the while, providing a secure environment.

## COMPLEMENTS SOLUTIONS

The range COMPLEMENTS Solutions is the association of aesthetic markers in the forms of time and sense of place.

Bollards, posts, and fences are some of many solutions we offer to protect the freedom of those who have to share space. In addition to an access control solution, COMPLEMENTS Solutions ensure the harmonization of pedestrian zones, and other living spaces.

This range is also composed of solutions for the distribution of energy (water, electricity, telephone, etc.) for marketplaces, fairs or nomadic business. Available in fixed or retractable options, they can be incorporated into a public space without spoiling it.

# Research & Development, Driver of Innovation

**Urbaco strives for continuous dedication to innovation to offer the best products.**

Since the invention of the retractable bollard in 1984, Urbaco has been innovating in the field of access control using retractable bollards.

To maintain its leading position, innovation is a determining factor in the Research and Development budget, which represents a significant part of the annual turnover.

Since the company was founded, Urbaco has designed six generations of retractable bollards. A range of over 60 models of fixed, removable and retractable bollards have been supplemented by a range of innovative products such as contactless access badges, access controllers, software and security systems (video, alarm, car parking access control, etc.).

**Urbaco bollards satisfy French, European and International standards.**  
**NF P 98 - 310** Dimensions and functional characteristics of retractable bollards  
**EN 124 - D400 / EN 124 - E600** Manhole covers and gratings for traffic areas used by pedestrians and vehicles  
**Italian Ministry for Infrastructures and Transport** – Approval No. 32658

**Urbaco** has received numerous awards, including:  
The Bronze Pyramid for Innovation in Paris for the retractable electricity distribution bollard.  
The “Trophée Départemental des Entreprises” awarded by the Vaucluse General Council for its dynamism and development.  
The Silver Medal for International Innovation in Paris for ENERCARTE  
The Grand Prix for Innovation and the “Prix de la Technicité” at the ExpoProtection Exhibition for the Proxybank System.

# Quality in every detail...

**Quality control is ensured through strict inspection standards and evaluation of the product during the entire manufacturing process.**

Urbaco, between its engineering department and CameGroup, designs and creates most of its products. Quality begins in our foundry and continues all the way through the production process guaranteeing a high level of reliability. Urbaco also designs all electronic products and systems for its access control systems and high security solutions.

The ISO 9 001 V. 2 000 certification is a testimony of the Urbaco brand that provides customers with long term assurance of the quality and durability of our products.

## ...patented

### **THE MONOBLOC CONCEPT®**

Urbaco's retractable bollards are made of parts cast solidly in one piece: no mechanical welding, no parts assembled together with bolts or screws, no wearing parts with limited life span.

The Urbaco structural parts ensure :

- no maintenance costs
- an uncommon resistance
- a guaranteed parallelism of the sliding rails

The mechanical properties of the cast metals used to manufacture our bollards validate their extreme sturdiness.

Their impact resistance was tested from 2,500 to 15,000 joules (certificates available upon request). Three bollards have shown an impact resistance of up to 675,000 joules (7 tons at 50 km/h / 31 mph).

## and recognized

### **HIGH SECURITY**

**Quality recognized by the most rigorous international standards in terms of impact resistance!**

The ONE range has been tested in accordance with standards ASTM2656 M50 - M40 - M30, DOS K12 - K8 - K4 et PAS68 7500/80 - 7500/64 - 7500/50.

# Corporate citizenship

Convinced that the company has a major role to play within society and that its business gives it a central place in urban development and social progress, Urbaco built its corporate culture on the values of Sustainable Development.

Driven by values which combine profitability with respect for individuals and the planet, Urbaco has had ISO 9001 and ISO14001 certifications for several years.

Resolutely turned towards the future, Urbaco wishes to pursue its actions to play a role in society that lives up to its convictions.

Because security is important to everyone, especially for those most vulnerable, Urbaco launches its PMR range, a series with sound and contrasting colors that come in specific sizes. The PMR range comply with the French decree of 15 January 2007 and the implementing Decree No. 2006-1658 of 21 December 2006 about technical requirements for optimizing the day to day travels of the disabled.

As a pioneer in the bollard market, Urbaco demonstrates its determination to evolve its social and civic duties by sponsoring the French Association Valentin Haüy.

ISO 9001  
ISO 14001  
BUREAU VERITAS  
Certification

The French Association Valentin Haüy, headquartered in Paris, was created in 1889 and was state approved in 1891. For 120 years, the Valentin Haüy Association has followed its founder mission to fight with and for visually impaired people to help their rights be recognized, as well as to support their continued full participation in society, both professionally and socially.

# The entire world...

In France, Urbaco is represented by a sales team and project managers, as well as through a network of distributors and installers.

## ...welcomes our products

Internationally, Urbaco is sold through CameGroup's subsidiaries in Europe, Asia, the United States, Africa and other exclusive distributors in targeted areas.

We have an extensive network that ensures the success of Urbaco's products on five continents.
